

AMELIA AKHILA AQNA

Kota Serang, Banten | 088291375357 | ameliaakhila29@gmail.com | Linkedin | Portofolio

Informatics Engineering Graduate (GPA 3.93/4.00) with hands-on experience in full-lifecycle software development, database management, and technical documentation. Skilled in JavaScript, PHP, Python, SQL, RESTful APIs, Next.js, and Laravel. Experienced in UI/UX prototyping with Figma and cross-functional team collaboration using Git, GitLab, and ClickUp.

EXPERIENCE

FRONTEND DEVELOPER
Apr 2026 - Aug 2026

PT Data Inovasi Integrasi - Intern

- Engineered modular **HRIS** web features using Next.js within a Micro Frontend architecture, completing **20+ ClickUp tickets** across **GitLab** repositories.
- Integrated backend **RESTful API** across 5+ core **HRIS modules** (Payroll, Overtime, Supervision) based on technical API specs, handling **dynamic pagination** and multi-key search.
- Built **responsive UI components** from Figma specifications, including schedule-comparison modals for Overtime Approvals, column visibility toggles, and mandatory form-field validations.
- Resolved **dynamic form-state conflicts** on Master Penggajian while **documenting bug** resolutions and routing behaviors in **Notion** for seamless team knowledge sharing.

AI ENGGINER
Jan 2026 - Jul 2026

Coding Camp Dicoding By DBS Foundation - Cohort

- Cross-disciplinary collaboration across three learning paths (**AI Engineer**, **Full-Stack Developer**, **Data Scientist**) to build the **Zonify WebGIS** platform.
- Development of a predictive machine **learning model based** on data from **662 retail locations** in **South Jakarta**, with detailed model results (Accuracy 77.44%, AUC-ROC 0.8655, and MAE 0.2256).
- Built a **Flask-based RESTful API** and integrated the **Google Gemini API** to provide real-time inferences and automated policy recommendations.
- Performed end-to-end spatial data preprocessing and deployed the AI inference pipeline on **Hugging Face Spaces**.

ROBORTICS INSTRUCTOR
Sep 2024

Banten Regional Jambore - Instructor

- Presented foundational material on robotics, electronic circuit design, and **Arduino microcontroller programming logic** to over **400 Scout participants** at the Banten Regional Scout Jamboree.
- Taught the operating principles of **electronic components** and provided hands-on guidance to participants during practical sessions on assembling basic **electrical circuits**.
- Demonstrating and explaining the workflow of real-world **robotics applications**, such as **an automated trash bin system** and **a smart traffic light simulation**.
- Simplifying complex concepts in **electrical engineering** and **hardware programming** so that participants can understand them intuitively.

PROJECT

SENA FARMA INVENTORY SYSTEM
Github Link

Full-Stack & ML Developer System (Laravel & Flask API)

- Built a pharmacy inventory management system with real-time stock tracking and automated demand forecasting.
- Integrated a **Python Flask ML** service using **Decision Tree Regressor** to forecast monthly stock needs with 99.5% accuracy.
- Developed multi-role dashboards (Admin, Pharmacist, Manager) for comprehensive inventory control, transaction logging, and analytical reporting.
- Tech: **Laravel**, **Tailwind CSS**, **TiDB Cloud** (**MySQL**), **Python Flask**, **Scikit-learn**, **Pandas**, **Vite**, **Vercel**.

ZONIFY WEB SYSTEM Github Link

AI Engginer (Flask API)

- A WebGIS-based zoning intelligence system with a monorepo architecture to analyze compliance in modern retail versus traditional markets by implementing spatial violation detection, retail density mapping, and automated location recommendations..
- Engineered a TensorFlow-based classification model (77.44% accuracy) and Gemini LLM integration for regulatory advisory, deployed as an AI service.
- Tech: **React.js**, **Leaflet**, **Node.js**, **Prisma**, **Python (Flask)**, **TensorFlow**, **Streamlit**, **Gemini API**, **Hugging Face**.

LOGIKALIA WEB GAMIFIED LEARNING Github Link

Frontend Developer (Next.js).

- An interactive gamified learning platform for computational thinking featuring decomposition puzzles, Boolean logic modules, and reinforcement learning simulations.
- Implemented real-time multiplayer arenas, an interactive world map progression system, custom narrative cutscene workflows, and comprehensive student moderation dashboards.
- Tech: **Next.js** (**React**), **TypeScript**, **Supabase**, **Tailwind CSS**, **Framer Motion**, **Zustand**, **Zod**.

CONSULTACY.ID Github Link

Full-Stack Web Developer (Next.js)

- A production-ready academic mentorship and thesis consultation platform offering comprehensive guidance for undergraduate and master's Tesis degrees.
- Implemented interactive pricing tier toggles, tutor profiling modules, **dynamic FAQ** accordions, and real-time **WhatsApp chat simulation mockups** for student testimonials.
- Engineered a **modular Next.js App Router** architecture with clean separation of concerns, smooth scroll animations, and optimized state handling using Framer Motion and Tailwind CSS v4.
- Tech: **Next.js**, **TypeScript**, **Tailwind CSS**, **Framer Motion**, **React**.

EDUCATION

UNIVERSITAS BANTEN JAYA - **Kota Serang** Sep 2022 - Oct 2026

Bachelor of Engineering in Informatics

- **Academic Achievements:** Graduated with a **GPA** of **3.93/4.00** and was awarded the Best Student Award by the Chancellor for outstanding academic achievement and leadership.
- **Undergraduate Thesis:** Developed a standalone web-based pharmacy inventory system with Machine Learning-based Decision Tree forecasting using the Flask API at Sena Farma Pharmacy (Laravel, Python, MySQL).

SKILLS

Frontend : Next.js (react), Shadcn, Tailwind CSS, Bootsrap

Backend : Express, Laravel, Flask

Database : MariaDb, PostgresSQL, MySQL.

Testing & Tools : Git, Github, Gitlab, Figma, Docker, Postman, Click-up, Trello, Notion, DBEaver, Draw.io
